quality

Complete range of textile testing equipment - Premier ART2 and HFT - High Volume Fibre Tester, Tensomaxx - yarn strength tester, IQ2 - Evenness Tester and IQON clearers for contamination removal.

products

The Premier Group's production covers a wide range of **Fine Combed Cotton Yarns**, manufactured at its various spinning mills.

We use the finest raw cottons of Medium Staple, Long Staple and Extra Long Staple chosen from Egyptian, American and Indian Origin.

The cotton is hand picked and processed on the latest generation spinning machine to produce the finest quality of yarns with a high level of softness.

We can also offer Compact spun yarn produced from latest compact spinning machine from Switzerland.

The company manufactures 100% combed cotton yarn from Ne30s to 240s in single, multi folded and gassed.

Super fine cotton yarns produced from SUVIN cotton (Sea Island variety) - the most exclusive and finest cotton in the world

Open End yarn from 100% re-generated cotton, counts Ne10s, 16s and 21s

These yarns are used for knitting, weaving, yarn dyeing and processing.

We can also manufacture the yarn to meet specific requirements from the customer. All yarns are spun with the utmost care in our manufacturing process

We are also a Supima licensee and our products carry the Oeko-Tex certification.
