- **Dual core FX yarn**
- **Functional yarn**

PACKING DETAILS FOR 1 * 40 HQ CONTAINER

CARTON:

- Total Net Quantity – 20,230.56 Kgs
- Total Gross Quantity – 21,675.60 Kg
- Total No. Of Cartons – 446
- Net Weight of each Cone – 1.89 Kg
- Net Weight of each Carton – 45.36 Kg
- Gross Weight of each Carton – 48.60 Kg
- Total No. Of Cones per Cartons -- 24

Our CARTON is of five Ply having five separators in each. Every cone has a cone holder in the bottom for safety. Each cone is wrapped in a plastic bag.

PALLET PACKING IS ALSO AVAILABLE.

sitaram

spinners pvt. ltd.

HERE ARE A FEW REASONS WHY YOU SHOULD BUY CORE SPUN YARN FROM SITARAM SPINNERS

PRECISION

We use world's best core spun attachment - Amsler, which ensures that the spandex yarn is perfectly placed at the core of the cotton yarn. The electronically drafted controls makes the system accurate and completely wastage free.

VERIFIED

A perfect monitoring system ensures that the spandex is present in each spindle and cone by trained personnels. The 100% verification process during production in each stage nullifies the chances of inferior quality yarn.

STRENGTH

The most ingenious yarn splicing system called the TWIN DISC SPLICER is used which gives better yarn strength while splicing which increases the loom efficiency by reducing breakages, instead of the conventional aqua / air splicers.

creora

LYCRA

The usage of the best quality spandex brands like Creora / Lycra (Invista / Dupont) reduces the breakages to less than 0.5 breaks/1000 spindle/hour as opposed to other manufacturers. Thus the productivity and the efficiency of the final product goes up almost by 20 times.
